## **Homegrown Pathways Internship Description**

Are you **passionate about your community**? Are you **curious** about what regional career pathways look like? Do you consider yourself **creative**? Then consider a **flexible PAID internship with Homegrown Pathways starting August 2024!**

MakerUSA is in the process of creating a new, non-profit organization called Homegrown Pathways, founded in Ridgway that helps young people explore regional career, post-secondary, and entrepreneurial opportunities.

We want YOUR help to **design and develop** this program that has potential to **impact youth all across our region and Colorado** as a whole. Your thoughts and ideas will be *foundational* to the program that we develop. Together, we will **ideate, brainstorm, create and iterate** on:

- **"Spark Day"** - a single-day experience that focuses on creating industry and regional pathway relevant experiences for students and
- **A new regional pathways toolkit** - a booklet that highlights growth sector, career, credential, certification, and degree opportunities in our region.
